
Hans Keirstead Talks About Hurdles in Developing a New Therapy

Earl J. Beadle Productions, Inc.

Stem cells have the potential to treat a wide range of diseases, but developing those cures is a process that has many hurdles. Dr. Hans Keirstead has a CIRM grant to develop a treatment for spinal cord injury. He is co-director of the Sue and Bill Gross Stem Cell Research Center and associate professor of anatomy and neurobiology at the University of California, Irvine.
